

AYUSH AHUJA

Java Backend Developer | Software Engineer | Java Microservices Developer

Targeting a challenging role as a Java Backend Developer, emphasizing expertise in developing enterprise-level banking applications that enhance user experience and operational efficiency, preferably Pan India.

PROFILE SUMMARY

- Java Backend Developer with over 3 years of experience in Java Development, Backend Development, Microservices, REST API Development, and Enterprise Application Development within the Banking and Financial Services domain.
- Strong expertise in Java 17, Spring Boot, Microservices, Hibernate, JDBC, SQL, PL/SQL, RESTful APIs, JWT Authentication, Kafka, Docker, Kubernetes, AWS, Linux, Git, and Shell Scripting, delivering secure and scalable back-end solutions.
- Experienced in developing and supporting HDFC NetBanking, Oracle Flexcube, and Open Banking Platform (OBP) applications, with expertise in transaction processing, authentication, banking integrations, and regulatory-compliant application development.
- Proven skill to optimize application performance by reducing OTP processing delays by 70%, improving API response times, implementing token caching strategies, and enhancing system scalability, security, and transaction reliability.
- Proficient in Agile Scrum, SDLC, production support, performance tuning, SQL optimization, code reviews, UAT support, release management, and cross-functional collaboration, ensuring high-quality and reliable enterprise software delivery.

TECHNICAL SKILLS

- Backend:** Java 17, Spring Boot, Hibernate, JDBC, SQL, PL/SQL, Microservices
- Frontend:** React.js, HTML, CSS
- Cloud & Tools:** AWS, Kafka, Git, Linux, Shell Scripting, Docker, Kubernetes
- Other:** Data Structures & Algorithms, RESTful APIs, XSL, Banking Domain Knowledge, Performance Tuning, Security Compliance

CORE COMPETENCIES

- Java Backend Development - Spring Boot & Microservices - REST API Development - Secure Transaction Processing - Enterprise Application Development	- Performance Optimization - Banking Application Development - SQL & Database Programming - Production Support & Deployment - Agile Software Development
--	--

ACHIEVEMENTS

- Achieved Oracle Certified Professional: Java SE 17 Developer & Oracle Certified Java Programmer (OCA, Java SE 8).
- Solved 300+ algorithmic and data structure problems on LeetCode, GFG, and other platforms, showcasing strong problem-solving and analytical skills.
- Delivered RBI-compliant solutions and assisted clients with regulatory queries, improving audit readiness and compliance.
- Completed 10+ full-stack projects in Web Development (Frontend + Backend) using modern technologies.

WORK EXPERIENCE

Software Developer

June 2023 – Present

Oracle Financial Services, Mumbai

Current Project – HDFC (Transaction & Customer Maintenance APIs)

- Developing RESTful APIs using Java 17, Spring Boot, Oracle SQL, and PL/SQL for Customer Maintenance, CASA, Term Deposits, Fund Transfers, and Fixed Deposit modules, integrated with Oracle Flexcube and OBP.
- Building secure back-end services by implementing JWT authentication, token caching, API security, input validation, exception managing, and developing SafeBox Hold Removal and TD Account Opening APIs.
- Optimizing SQL/PLSQL queries, stored procedures, back-end processing, and authentication workflow to improve API performance, scalability, and system reliability.
- Collaborating with cross-functional teams on Agile SDLC, performing code reviews, resolving production issues, supporting deployments, and delivering secure, high-quality banking applications.

Achievements

- Delivered Customer Maintenance, CASA-to-Term Deposit Fund Transfer, and Fixed Deposit APIs, enhancing digital banking, customer self-service, and secure transaction processing with robust business validations.
- Developed scalable, secure REST APIs supporting interest calculation, maturity processing, and sweep functionalities, contributing to the modernization of HDFC Net Banking services.

Previous Project – HDFC Net Banking Platform

- Developed and enhanced HDFC Net Banking applications using Java, Spring Boot, REST APIs, Oracle SQL, and PL/SQL, delivering secure account management, fund transfer, balance inquiry, transaction history, and other digital banking functionalities while supporting legacy system modernization.
- Implemented JWT-based authentication, transaction rate limiting, and a dual-queue OTP processing mechanism, reducing OTP delivery time by 60–70% (from 4–5 minutes to under 1 minute), improving scalability during peak transaction volumes, and strengthening API security.

- Optimized SQL/PLSQL queries, back-end processing, and application logic to improve API response times, system performance, transaction throughput, and high-volume banking operations, while delivering banking enhancements including FDOD, KFS, & critical production defect fixes.
- Supported production monitoring, incident resolution, root cause analysis (RCA), UAT, production deployments, RBI compliance, and collaborated with cross-functional teams to ensure secure, reliable, and high-availability enterprise banking solutions.

PERSONAL PROJECT

NetBanking Application

Technology Stack: Java, Spring Boot, Spring Security, JWT, Hibernate, JPA, REST APIs

- Designed and developed a secure Net Banking application using Java, Spring Boot, Spring Security, JWT, Hibernate, JPA, MySQL, HTML, CSS, and JavaScript, implementing RESTful APIs, layered architecture, secure authentication, authorization, transaction logging, and exception managing.
- Developed customer dashboard, account summary, transaction history, expense tracking, fund transfer (simulation), and beneficiary management modules, while optimizing database operations through Spring Data JPA, Hibernate, and efficient SQL queries.
- Delivered an enterprise-grade banking solution by implementing JWT-based API security, secure back-end architecture, and industry-standard coding practices, strengthening expertise in Java back-end development, REST API design, and secure application development.

CERTIFICATIONS

- Oracle Certified Professional: Java SE 17 Developer | 2024
- Oracle Certified Java Programmer (OCA, Java SE 8) | 2023
- Java Backend Certification – GeeksforGeeks (Credential ID: 204276ff1e0f990669a0886ef434b8ec) | 2023
- SQL Certification – HackerRank (Credential ID: b9dc862ca5dc) | 2022
- Python Certification – HackerRank (Credential ID: 23cf60d69c64) | 2022
- Django – Kamal Classes (Credential ID: OLDJ627) | 2021
- Machine Learning – Kamal Classes (Credential ID: OLMLFL1132) | 2021

COMPETITIVE PROGRAMMING PROFILE

- LeetCode: [ayush2707](#) | GeeksforGeeks: [micchael20](#) | GitHub: [AyushAhuja2707](#)

EDUCATION

Master of Science (Computer Science) (Pursuing) | Woolf University | 2026 – Present

Bachelor of Engineering (Computer Engineering)

Thakur College of Engineering & Technology, Mumbai University | 2023 | CGPA: 9.78/10

PERSONAL DETAILS

Address	: Thane-400610
Date of Birth	: 27 th July 2001
Languages known	: English, Hindi
